

Avery Dennison™ System 1000 II®

Tag 1,000 items without reloading. That's twenty times more than standard attaching tools. The System 1000 II features a unique mechanism that smoothly advances the proprietary "connected paddle" fasteners to save effort and maximize productivity.

Now better than ever before! System 1000 II has been expertly redesigned to virtually eliminate jamming, offering exceptional tagging capabilities for most general purpose and heavy-duty applications.

From apparel and produce tagging to industrial packaging, with the System 1000 II you'll experience maximum output, reduced waste and longer tool life.

Key features and benefits

- Save time on reloading - load 1,000 fasteners on a roll vs. 50 fasteners per clip.
- High feed reliability significantly reduces jamming, increasing productivity and output.
- Lightweight and comfortable for manual usage, yet tough enough to endure the forceful actuation of a power unit.

Brand Identification Tagging

The System 1000 II will also attach your company name, brand, feature, size, etc. with our Brand Identification fasteners. These fasteners can be printed on the front, back, or both and are available in virtually any color.

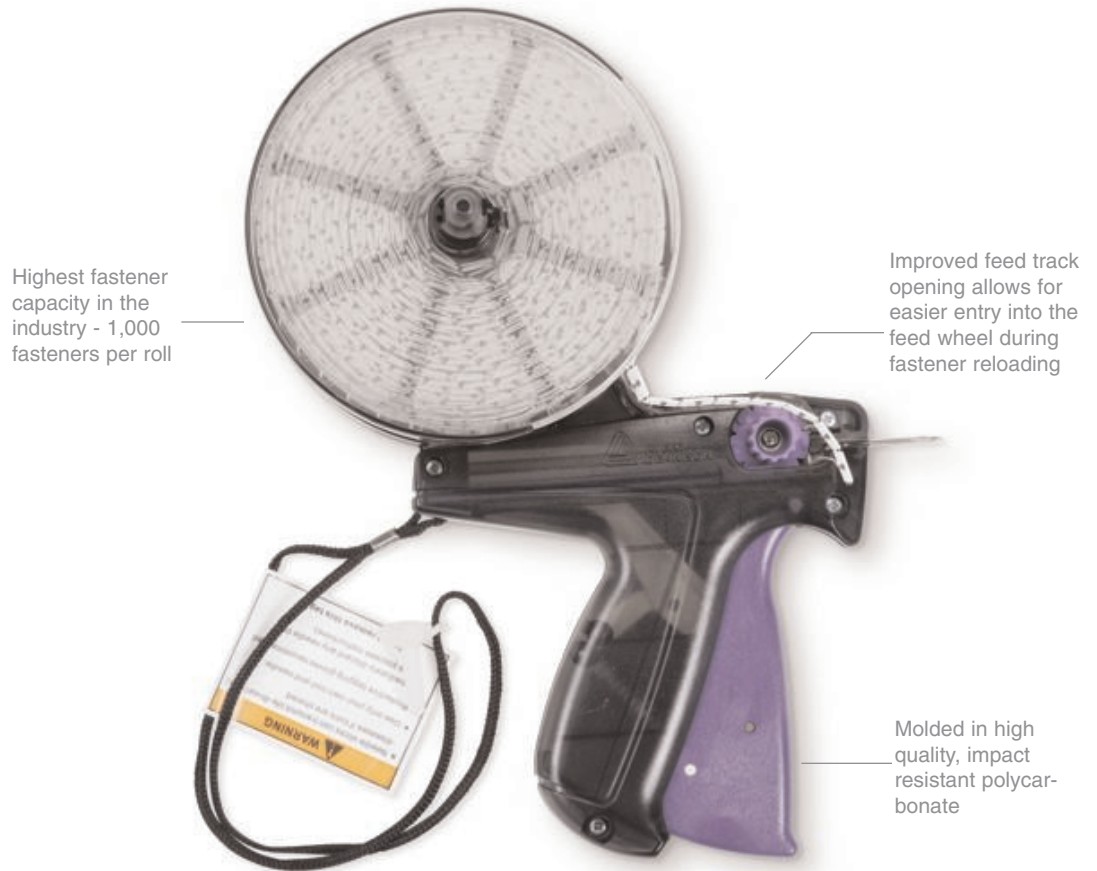

System 1000® II Hand Tool

Avery Dennison™ System 1000 II®

Fastener Solutions.

Highest fastener capacity in the industry - 1,000 fasteners per roll

Improved feed track opening allows for easier entry into the feed wheel during fastener reloading

Molded in high quality, impact resistant polycarbonate
