

Avery Dennison™ T-Slot Connector Tie

Save time, with the simple, single-part solution.

The T-Slot Connector Tie for efficient wire management.

Avery Dennison, Fastener Solutions, is an experienced manufacturer in the molding and extrusion of quality plastic fasteners. We specialize in cable ties designed specifically for automotive wire harness management. Our new innovative T-Slot Connector Tie offers a solution for securing electrical connectors where inner vehicle wire routing is challenging.

The T-Slot Connector Tie is designed to fasten easily and securely to prevent rattling and loosening of parts. This single-piece molded fastener simplifies assembly by eliminating the need for 2-piece fastening methods. It combines a slotted feature specific to a connector mounting slot with our curved cable tie strap, making it possible to securely affix an electrical connector to a wide range of wire harness diameters. In addition, these features offer a portable alternative to common fastening methods requiring a fir tree clip and panel hole or bracket for mounting.

Avery Dennison is committed to product innovation, service excellence and maintaining the highest quality standards to exceed our customers expectations (Quality Management: ISO/TS16949, Environmental: ISO14001, Health and Safety: OHAS18000).

With over 30 years experience in product development and innovation, Avery Dennison can design a slotted feature that will adapt the T-Slot Connector Tie to meet your specific needs.

Key features and benefits.

- A single-piece solution taking the place of two part methods
- Improves assembly efficiency
- Adaptable slot feature to meet specific connector mounting needs
- Punched hole or bracket is not required
- Added versatility for wire routing placement
- Fits a wide range of wire harness diameters
- High temperature materials available

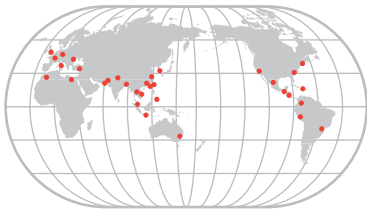

Fasten electrical connectors to wire harnesses with just one part.
